

EFFECT SPECIFICATION

Dear Friends,

We proudly introduce our new boutique line of products, the Taurus Silver Line of bass pedal effects, which shares all Taurus's DNA and is designed to satisfy even the most demanding musicians. Our Silver Line includes four heavy duty stomp boxes labeled Abigar (Multi-Drive), Zebu (Reverb-Delay), Vechoor (Multi Chorus-Flanger) and Tux (Compressor-Limiter). Individually engineered with the specific objective of giving you unprecedented control over the sound. It has been said that "Passion drives you to fulfill your dreams". Our founder, head of the corporate research and development, sound and electronic engineer and most of all musician, is spreading his passion and dedication on all of us. Box Electronics, makers of Taurus is fulfilling its dreams and wants to give you the tools to fulfill yours. Our passion supported by the latest technology, best electronic components, hand crafted manufacturing and quality control process guarantees superior quality and complete satisfaction. For the past 27 years, our philosophy remains to provide you with the upmost professional service and the best musical gear. Try our Taurus products, you won't be disappointed. We welcome you to our web site which has received a major face lift and has been extended to include more in depth technical product information, links to users, applications, silver line reviews, testimonials and much more.

Taurus T-Di is a foot pedal preamp, what can be an alternative solution to amplifier for solid and powerfull bass sound. It can also be used as a booster for your amplifier. You can connect it directly to mixing console on stage in recording studio or HiFi equipment. You can use it as typical Di-box or plug into your arsenal of pedal effects. MLO System means unique and comfortable sound colour creation. It's very easy and intuitional using only two bass and treble knobs. MLO gives you new possibilities - it provides optimal mid frequencies proportion, depending on position of bass and treble knobs. This method assists musician's intentions in logical and effective way while tone is regulated. Additionally the MLO-system results in same level volume output no matter how the low frequency control knob is positioned. Musician can clearly feel only tone changes of the instrument, not its amplifying, like it takes place in standard solutions.

Features:

1. INPUT - mono 1/4" (jack)
2. OUTPUT - mono 1/4" (jack)
3. POWER SUPPLY - External 12V/100mA
Internal voltage converter (12V to 24V) for greater dynamic range

Warning ! Only the power supply included with the effect must be used.

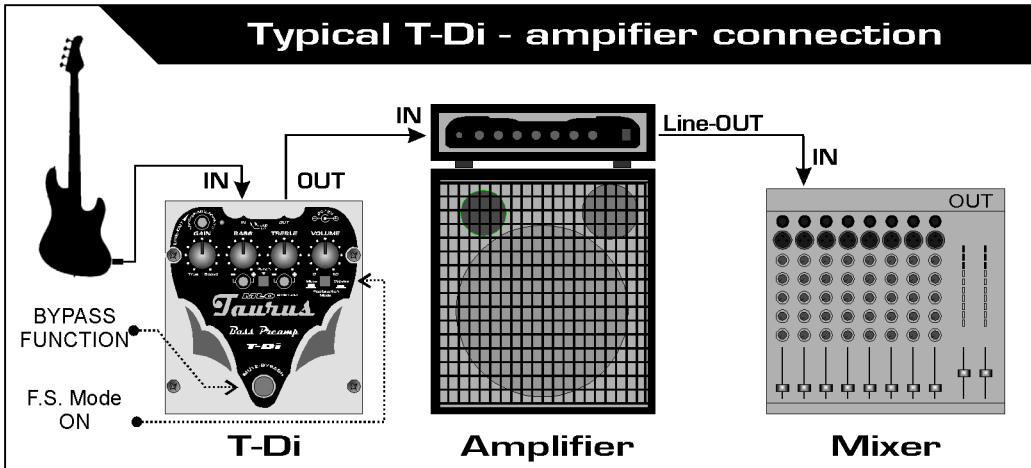

4. **Vintage-MIX-Modern** - triple mode switch of sound character - for your disposal classic "Vintage" sound, "Modern" tube simulation and "Mix" between "Vintage" & "Modern" sound.
5. **GAIN** - input gain preamp knob. "True" pos. gives you direct and true signal from your guitar.
6. **BASS** - bass level knob with MLO system.
7. **TREBLE** - treble level knob with MLO system.
8. **VOLUME** - preamp volume level knob.
9. **BASS** switch with DBS system.
10. **TREBLE** switch gives presence to your sound.
11. **PUNCH** - midrange effectiveness switch.
12. **Footswitch Mode** - true bypass/mute footswitch mode selector
- footswitch mode off "Mute" - Mutes signal after turning off T-Di, works like a classic preamp and Di box.
- footswitch mode on „Bypass"- preamp is turned off, but it works as a true bypass device.
13. **Footswitch**. If it's turned off true-bypass is active.
14. OUTPUT - XLR - mixing console connection (balanced)
15. **Power led**.
16. **Ground lift switch**.

Warning! The effect is turned off only when the power supply is unplugged.

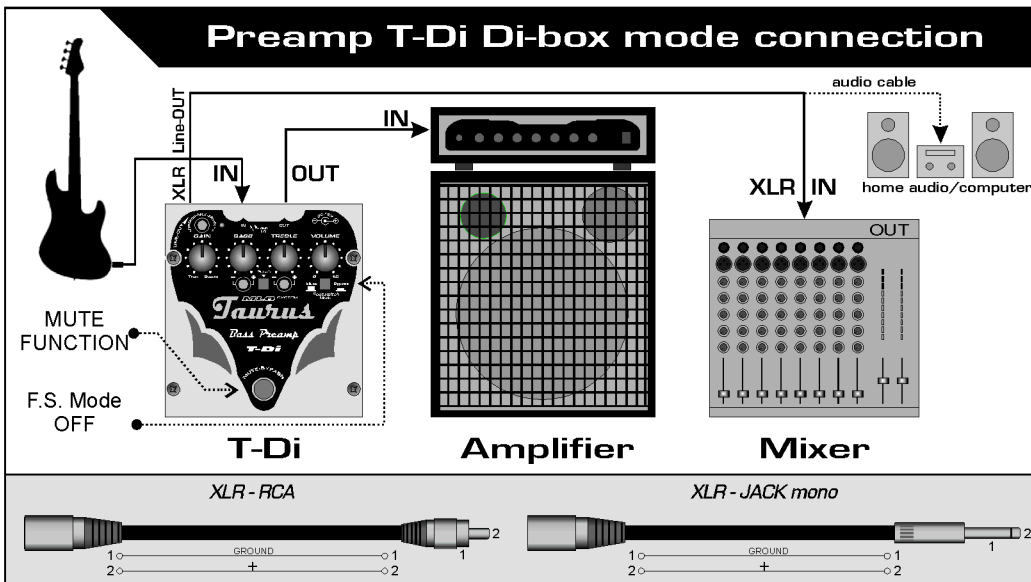

Thank you for your trust and for choosing Taurus TDi
